Continuation of 11. does NOT place the application in condition for allowance because: the Examiner is not bodily incorporating the structure of the JP'010 in the structure of Yoshikawa et al. as implied by Applicant in arguments and the filed Declaration under 37 C.F.R. 1.132. It is noted that the primary reference of Yoshikawa et al. provides the claimed structure except that it fails to explicitly indicate that the substrate is a nonwoven; the Examiner relies on the teaching of the JP '010 reference to show that the use of a nonwoven substrate would have been obvious to one of ordinary skill in the art of rubber based reinforcing composites.
